Our Mission

To prevent incidents and injuries across the energy industry through active **Leadership**, member **Collaboration** and workforce **Engagement**

The member organisations of Step Change in Safety share a common set of beliefs. These shared beliefs drive everything that we do and help us work together to achieve our vision.

We declare our personal commitment to action in the following key areas:

- All workers have a fundamental right to work in an environment where risk to their health and wellbeing are properly controlled
- We each have an individual responsibility for safety and wellbeing
- We have a moral duty to learn from the past and share those learnings
- Industry collaboration is key to achieving our mission
