

Rigging Lofts

1ST INTEGRATED
LIFTING | INSPECTION | RENTALS

Equipment Management

First Integrated Solutions are leading providers of 10ft and 20ft Bespoke Rigging Loft Containers to our International and UK based clients within the energy industry.

The contents of the rigging lofts are client specific and provided from our vast portfolio of owned lifting equipment. First Integrated Solutions work with leading manufacturers within our supply chain to provide safe, quality, and compliant lifting solutions.

Each Rigging Loft is supplied with a full certification package and instructions for use for each item. Equipment is controlled using a T Card system where equipment can be logged in and out.

Loft Management Training

Rigging lofts systems are the industry recognised practical management process for the control, storage and inspection of all portable lifting accessories and equipment.

Working with First Competence we can provide detailed training on the correct methods of managing and controlling lifting equipment, which is used to conduct a variety of operations.

We can now supply virtual reality loft management training scenarios. This allows our clients to train wirelessly and remote from anywhere in the world with a Wi-Fi connection and an Oculus Quest device.
